

Learning Journal Guidance Sheet

Set up your page with the date (top right) and Focus (top central)

Tuesday 24th March 2020

Focus: I can understand the lifecycle of an insect and write about the different stages.

On one page of your journal draw the lifecycle of an insect.

You will need to research your chosen insect and complete the stages with pictures, labels and some writing that explains what happens in each stage of development.

I have included an example of this as a guide but please present this in your own chosen way, including colour and fine liner if possible.

The Insect Life Cycle

Complete by drawing a picture and writing a title and an explanation for each stage.

Blank writing area for stage 1, containing five horizontal lines.

Blank writing area for stage 2, containing five horizontal lines.

Blank writing area for stage 3, containing five horizontal lines.

Blank writing area for stage 4, containing five horizontal lines.
